THE POWERED Life

POWERED BY COMMUNITY

Proud to power the moments that matter the most

New-Mac Electric Cooperative
Your Touchstone Energy® Partner

Meet Carl Childress

For the past 40 years, Carl Childress has helped keep New-Mac's fleet running safely and reliably. As our mechanic, his expertise, dedication, and steady commitment have played an important role in supporting the crews who serve our members every day.

Whether it's routine maintenance or unexpected repairs, Carl's work behind the scenes helps ensure our vehicles are ready when they're needed most.

Thank you, Carl for four decades of being a valuable part of the New-Mac family. Congratulations on 40 years!

AUGUST 2026

BEAT THE HEAT *Without Sacrificing Comfort*

Small changes can make a big difference. By using energy wisely, you can stay cool while helping manage your monthly electric bill.

August is often one of the hottest months of the year, and after weeks of high temperatures, your air conditioner may be working harder than ever. That extra cooling can lead to higher electric bills.

Try these simple tips to stay comfortable while using energy wisely:

- Adjusting your thermostat up a few degrees can make a big difference.
- Run ceiling fans counterclockwise.
- Close blinds or curtains during the hottest part of the afternoon.
- Replace dirty HVAC filters regularly.
- Use appliances that create heat, such as ovens, dishwashers, and dryers during the morning or evening when possible.

COMMUNITY *Matters*

We were proud to sponsor this leadership opportunity through the *Cooperative Youth Conference and Leadership Experience (CYCLE)*.

During the conference, students from across Missouri developed leadership skills, learned more about electric cooperatives, and built friendships with peers from around the state.

We are proud to power more than homes - we power partnerships, opportunities and brighter futures across the communities we serve.

Congratulations to our
2026 CYCLE winner!

YOUR POWER'S JOURNEY

Ever wonder how electricity gets from a power plant to your home?
It takes three cooperatives working together to deliver safe, reliable power to our communities.

1 GENERATE

aeci
Associated Electric Cooperative Inc.

Associated Electric Cooperative generates electricity at power plants.

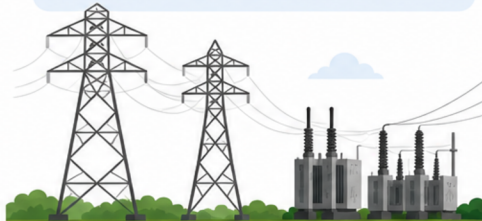

Electricity is generated at power plants.

2 TRANSMIT

KAMO POWER

KAMO Power moves electricity across high voltage transmission lines to local substations.

Electricity travels long distances over high voltage lines to substations.

3 DISTRIBUTE

New-Mac Electric Cooperative
Your Touchstone Energy® Partner 

New Mac delivers electricity through local power lines to your home, farm, or business.

Electricity is delivered through local lines to your home, farm, or business.

WHY DOES THIS MATTER?

Each cooperative plays a different role, but we all work together to provide safe, reliable, and affordable electricity to the communities we serve.

ASK AN EXPERT

Why do my lights blink occasionally?

A quick blink of your lights is sometimes a good sign.

It usually means protective equipment on the electric system is doing its job. If a tree branch, animal, or another temporary issue contacts a power line, automated devices briefly interrupt power and quickly restore it, often preventing a longer outage for you and your neighbors.

If your lights blink frequently or continue to flicker, contact us. We have tools available to us that can help to zero in on the root case.

Every successful job starts with teamwork. Whether building new lines, upgrading equipment, or restoring power after a storm, our crews work together with safety and precision to serve our members every day.

MEMBER SPOTLIGHT

DOWNRANGE PROCESSING, LLC

This month, we're proud to spotlight DownRange Processing north of Seneca.

DownRange Processing is a locally owned business providing custom meat processing for beef, hogs, deer, and more. Whether it's processing livestock for local families or preparing wild game during hunting season, their team is known for quality workmanship, dependable service, and attention to detail. Serving customers from across the region, DownRange Processing plays an important role in supporting local agriculture, hunters, and families. Their commitment to quality and dedication to serving the community make them a valued part of southwest Missouri.

We're proud to have DownRange Processing as a member of New-Mac Electric Cooperative. Congratulations on your recent ribbon cutting and the grand opening of your new Retail Market. We wish you continued success and thank you for the work you do to serve our communities.
